PROJECTS

MoveBytes
Feb. 2019 to Mar. 2019

- Allows users to send large files to others by download link sent in automated email.
- I built the front end using ReactJS, React Hooks, React Router, Axios, Auth0 Lock, and styled-components.
- This project was a five week five member project.
- https://www.movebytes.com/

Notes Back End
Oct. 2018 to Oct. 2018

- Five day solo project to create back end to interface with pre-existing note taking front end.
- The API enabled note creation, display, editing, and deletion with data persistence provided by a PostgreSQL database.
- Express JSON web tokens were used with middleware to authenticate user tokens.
- GitHub: https://github.com/ThomasKisner/back-end-project
